EDUCATION

Indiana University, Luddy School of Informatics - Bloomington, IN   May 2025
Bachelor of Science in Informatics   **GPA: 3.4/4.0**
Cognate: Web Design and Development
- Dean's List [Fall 2022]
- Core Curriculum: Information Infrastructure I & II, Web Design, JavaScript, Application Development- Java

PROJECTS

Landing Page   August 2023 - September 2023
HTML/CSS/JS
- Created the HTML and CSS to closely resemble the original design, improving my skills in layout and styling for a responsive and visually appealing result.
- Developed a custom image slider, elevating user engagement and deepening my knowledge in JavaScript for creating interactive web elements.

Weather App   June 2023 – July 2023
HTML/CSS/JS
- Integrated a weather API to fetch real-time weather data, enhancing JavaScript skills for API requests and response handling.
- Leveraged the Unsplash image API to enrich user experience by including a contextually relevant background image.

Pokémon Game   April 2023 – May 2023
Python
- Constructed a terminal-based game allowing users to select and participate in battles with Pokémon, while strengthening my understanding of object-oriented programming.
- Utilized modularity by breaking down complex functions into smaller reusable components, resulting in improved code maintainability, scalability, and development efficiency.

TECHNICAL SKILLS

Languages: Java, Python, HTML, CSS, JavaScript
Frameworks: Flask, Bootstrap, ReactJS
Workflow: Git/GitHub

EXPERIENCE

Jewel Osco   August 2019 – August 2021
Cashier/Stocker
- Provided exceptional customer service as a cashier, handling inquiries, processing payments, and assisting customers with purchases, which helped me improve my communication and people skills for better customer interactions.
- Efficiently organized product deliveries, optimizing store layout and visual appeal through attention to detail.
