EDUCATION

Indiana University

Luddy School of Informatics, Computing, and Engineering

Bachelor of Science in Informatics; Minor: Web Design and Development

- Relevant Coursework: Web Design, JavaScript, Cloud Computing

Bloomington, IN

Aug 2021 - May 2025

EXPERIENCE

Front-End Developer Intern

Sciquel

June 2024 – Present

Remote

- Develop React + TypeScript components with strict typing to improve reliability and reduce runtime errors
- Build dynamic, server-rendered pages in Next.js with API and database integration to improve SEO and performance
- Implement responsive, accessible UI with TailwindCSS, translating Figma mockups into production-ready components
- Collaborate with supervisor to deliver iterative UI improvements based on feedback

TECHNICAL SKILLS

Languages: Java, Python, HTML, CSS, JavaScript, TypeScript, PHP

Frameworks: React.js, Next.js, Node.js, Express.js, Flask, Bootstrap, TailwindCSS, MUI, TanStack Query

Databases: PostgreSQL, MySQL

Platforms/Tools: AWS (EC2, S3, IAM, CloudFront, Lambda, CloudFormation), Git, Figma

TECHNICAL PROJECTS

Full Stack Recipe App | *React.js, MUI, Express.js, Node.js, PostgreSQL*

Jan 2025 – June 2025

- Developed a recipe platform with search, save, and collection features; integrated Spoonacular API for nutrition data
- Built RESTful API with Node.js/Express.js and PostgreSQL for user, recipe, and collection management
- Implemented JWT authentication for secure, stateless login
- Optimized client performance with TanStack Query for caching and background updates
- Managed multi-step forms with React Context API to streamline data flow
- Designed polished, responsive UI with MUI components

Capstone: Club Finder Application | *PHP, MySQL, JavaScript, Bootstrap*

Aug 2024 – May 2025

- Developed platform for students to create, join, and manage clubs with recommendations and event scheduling
- Collaborated in a 4-member team to design database schema, user flows, and requirements
- Integrated Indiana University's SSO (CAS) with PHP sessions for secure authentication
- Used JavaScript for DOM manipulation to create interactive elements and handle user actions
- Automated email reminders for starred events with EmailJS to boost engagement

Event Management System | *Python, Flask, MySQL, AWS, Bootstrap*

Oct 2023 – Dec 2023

- Created full-stack event management app with CRUD functionality for events and attendees
- Designed and maintained MySQL database schema for event and user data
- Deployed application on AWS (EC2, RDS), migrating from on-prem server to the cloud
- Built responsive layouts in Bootstrap, improving accessibility and usability
